

## endured pulse power flat chip resistors (ultra precision grade)

### features

- Superior to RK73 series chip resistors in pulse withstanding voltage and high power
- High precision resistor with T.C.R.  $\pm 50 \times 10^{-6}/K$  and tolerance  $\pm 0.25\%$ ,  $\pm 0.5\%$
- Suitable for both reflow and flow solderings
- Products with lead-free terminations meet EU RoHS requirements. EU RoHS regulation is not intended for Pb-glass contained in electrode, resistor element and glass.
- AEC-Q200 Tested

### Derating Curve

For resistors operated at an ambient temperature of 70°C or above, a power rating shall be derated in accordance with the derating curve.

For resistors operated at a terminal part temperature of described for each size or above, a power rating shall be derated in accordance with the derating curve. Please refer to "Introduction of the derating curve based on the terminal part temperature" in the beginning of our catalog before use. \*1 If you want to use the rated power of \*1, please use the derating curve based on the terminal part temperature on the right hand side.

### ordering information

	0.5W*1	—	120°C					

Parentheses indicate EIA package size codes. Rated voltage =  $\sqrt{\text{Power rating} \times \text{resistance value}}$  or max. working voltage, whichever is lower. If any questions should arise whether to use the "Rated Ambient Temperature" or the "Rated Terminal Part Temperature," please give priority to the "Rated Terminal Part Temperature." Prior to use and for more details refer to "Introduction of the derating curves on the terminal part temperature" in the beginning of the catalog. \*1 If you want to use the rated power of \*1, please use the derating curve based on the terminal part temperature on the previous page.

## environmental applications

### Temperature Rise

Regarding the temperature rise, the value of the temperature varies per conditions and board for use since the temperature is measured under our measuring conditions.

### One-Pulse Limiting Electric Power

The maximum applicable voltage is equal to the max. overload voltage. Please contact factory for resistance characteristics of continuous applied pulse.

## Performance Characteristics
